

MICROGRAPH

the V.N. and a tongue or sucker O, which I ha  
out. Besides these, it has also two chap  
somewhat like those of an Ant, but I could not  
were shap'd very like the blades of a pair  
and were opened and shut just after the same man  
does this little brute Creature bite and pie  
the blood of an Animal leaving the skin inflam  
red spot. These parts are very difficult to be dis  
the most part, they lie covered between the fore-  
other particulars, which, being more obvious, an  
matter of information, I shall pass by, and refer  
figure.

Obser. LIV. Of a Louse

This is a Creature so officious, that 'twill be  
one time or other, so bulie, and so impudent  
ing it self in every ones company, and so proud  
that it fears not to trample on the best, and affect  
Crown; feeds and lives very high, and that mak  
any one by the ears that comes in its way, and wi  
has drawn blood: it is troubled at nothing so  
scratches his head, as knowing that man is plotting  
mischief against it, and that makes it oftentimes ke  
and lower place; and run behind a mans back, the  
against the hair; which ill conditions of it having n  
been trusted, would exempt me from making any  
I did not my faithful Mercury, my Microscope, b  
tion of it. For this has discovered to me, by me  
the call on it, that it is a Creature of a very odd  
d like that exprest in 35. Schem. marked with  
Conical, but is a little flatted on the upper and  
part of which, on either side behind the head  
the place where other Creatures ears stand) are p  
goggle eyes BB, looking backwards, and fer  
small cilia or hairs that incamp it, so that it h  
a very good foresight: It does not seem to have  
therefore perhaps its eyes were so placed, that it might  
come with its fore-legs; and perhaps this may be the re  
much avoid and run from the light behind them, fo  
be the shady and dark recesses of the hair, and then  
having a great aperture, the open and clear light  
of the Sun, must needs very much offend them, to  
receiving any injury from the hairs through which
